Further details of the requirements and the conditions governing their supply can be obtained free on request from The Principal, Govt Medical College Kottayam till **4.2.2026,12pm**.

Specifications

- The reticule sits. Common sizes: ~ 19 mm, 20 mm.
- 10 mm/100 divisions (so each division = 0.1 mm)
- Good reticules have tolerances like ± 0.01 mm pitch, ± 0.02 mm total length
- Optical glass (e.g. glass B270 or similar), good etching; avoid very thick or cheap materials that introduce optical distortions
- Too thick lines obscure detail: too thin may fade or be hard to see. Also the contrast (etching vs darker lines) is important.
- Reticule should be well mounted, scratch-resistant; glass should be hardened/tempered or protected; stable under temperature/humidity
